Lime-Loss In Tuberculosis.

Lime-Loss in Inderculous.

In the Journal of the American Medical Association (January 17, 1818) was the following:

"It has been many times stated that in tuberculosis or in the pretuberculosis stage an increased amount of calcium (time) is lost both in the urine and feces. In fact, a demineralization has been thought to be a fore-runner of the development of tuberculosis."

If tuberculosis is due to lime loss.

If tuberculesis is due to lime loss,
the success of Nekman's Alterative in
its treament may be due, in part, to
its content of a lime sait so combined with other valuable ingredients
as to be easily assimiliated.
Always we have urged consumptives
to attend stricly to matters of food,
